

PEKER GAYRİMENKUL YATIRIM ORTAKLIĞI A.Ş.
ENVIRONMENTAL POLICY

As Peker GYO, Turkey's leading renewable energy company, we believe that in order to be successful in the long term, we need to create value for our stakeholders and society; we adopt an approach that considers the sustainability of natural resources, the environment and the needs of future generations.

Recognizing that natural resources are finite, we focus on climate change adaptation, zero waste and promoting sustainability while working to do better today and for the future to protect biodiversity. We continue to contribute to the sustainable growth of our country and prepare a better future for society and the next generations.

Preventing pollution and protecting the environment by making environmental impact assessment;

- Taking under control the elements that cause environmental destruction,
- Carrying out activities that will contribute to continuous improvement related to reducing environmental negative impacts,
- Reducing our waste, recycling and preventing pollution,
- To establish environmental goals and objectives and to monitor the compliance of the activities carried out during the year with these goals and objectives,
- Ensuring continuous improvement in environmental performance,
- Preferring environmentally-friendly and energy-efficient products and services,
- Becoming an organization that constantly learns, constantly develops and shares environmental awareness training activities,
- Keeping initiatives on environmental improvement alive through effective communication with our stakeholders,
- Complying with the legal regulations, standards, directives and rules of the institutions we are affiliated with within the scope of our activities,
- Reaching international standards in our activities,
- Announcing this committed and implemented policy to all employees,
